

**WATER AND SEWER ADMINISTRATION
FISCAL YEAR 2008 - 2009**

Statement of Purpose

Provide a source of clean drinking water and environmentally responsible sewage disposal in the unincorporated areas of the county.

Outcomes

1. Provide for fair and equitable decisions in determining water and sewer infrastructure projects Countywide through the utilization of the Catawba County Utility Prioritization Tool in the annual water and sewer Capital Improvement Plan as submitted in the annual budget.
2. Continue to remain abreast of the water and sewer needs of the municipalities of the County to assist them in providing clean drinking water and environmentally responsible sewage disposal by facilitating meetings of the Utility Technical Advisory Committee as needed.
3. Provide for the continued economic development assistance and environmental protection that water and sewer infrastructure offers through projects such as:
 - a. The continued development of the EcoComplex and Resource Recovery Facility.
 - b. The design, and construction of the Bunker Hill, Riverbend, and Oxford Schools wastewater project.
 - c. The development, design, and construction of the Southeastern Catawba County (SECC) Wastewater project.
